MYPRO TOUCH+ VNC Viewer Guide

1. Download and install one of the recommended VNC viewer softwares.
   a. **Tight VNC**: http://www.tightvnc.com/
   b. **Real VNC**: https://www.realvnc.com/

2. Configure network settings at both the MYPRO TOUCH+ and the computer. Contact your IT administrator for proper settings.

3. From the MYPRO TOUCH+, press the **MENU** button.

4. Open **MENU 2** and select the **COMM** icon.
   
   Level 01 credentials are required. User credentials may be entered, by selecting the USER NAME field at the top center of the screen.

5. Touch the **SET UP VNC** text, to open the **VNC Options** window.
6. Touch the **Start VNC Viewer** button.
7. Touch **[OK]** at the upper right of the window to close the window.

8. Open the VNC viewer software at the computer.
9. Enter the **IP address** of the panel and select **[Connect]**. The HMI screen should display on the computer screen.
How to Setup VNC to AUTO START after a Power Cycle

1. At the VNC Option window open the Advance tab.
2. Check Auto Start, Silent Startup and leave Show Taskbar Icon checked.

Stop and Start VNC server again from the Control tab.
3. Power cycle the HMI to complete the setup.
4. After the HMI comes back ON, the HMI should be accessible through a VNC server without having to enable the VNC viewer each time.
