LONG LIFE
The W-Series of compressors have proven to be a reliable industry standard for industrial refrigeration applications for over 50 years in North America. With periodical maintenance and correct use, the MYCOM reciprocating compressors can last for decades and result in low life cycle ownership.

MAX 377 PSI
The WBHE-Series can handle higher pressure applications, applicable with Freon refrigerants, such as HFC-R404 and R507.

DIMENSIONS & SPECIFICATIONS
Dimensions are for reference only. Please contact MYCOM for more detailed drawings.

FLOATING HEAD PRESSURE
Reciprocating compressors do not require a Vi adjustment when the compression ration changes due to varying condensing pressure. Reciprocating compressors are always at their ideal BHP/TR performance level and out perform the efficiency of screw compressor at most load conditions.

OIL COOLING
Water-cooled or DX-cooled can be selected. Unlike screw compressors, the cost of building an oil cooling system on our compressors is very small and simple.

HEAD COOLING
Water-cooled, DX-cooled or Air-cooled options can be selected, depending on the refrigerant and application.
